Project Name:

Computer Braille System

Project Location:

Pune, India

Project Summary:

Provide a computer Braille system and teacher training.

Project Detail:

This project will install the computer Braille system at the Sant Gadge Maharaj School School.

The teachers will be trained on how to use the system. Follow-up on the success of the program will also be conducted.

Project Partner:

Arham Charities
Arham.us

Project Cost:

$1,200

TGUP, in partnership with Arham Charities, will coordinate the installation and training of a Braille system called "Knowledge Vision" at the Sant Gadge Maharaj School, which is a residential school in Pune, India.

The school is dedicated to helping children from underprivileged and/or who are orphaned and abandoned.

The teachers will undergo intensive training on the new computer system. There are currently over 500 students who attend the school and 60 visually impaired students in grades 9 and 10.

The teachers, some of whom are visually impaired, will also benefit from the new computer application.
