

17th June 2025

Dear Rotarian Friends,

Re: Science Lab in a Box – Uganda Initiative

I write to you with both excitement and profound optimism.

Our Rotary team has thoroughly reviewed the *Science Education Uplift Uganda* initiative and firmly believes it represents a transformative opportunity for our nation's future.

Ugandan youth are diligent, ambitious, and eager to embrace the modern world. Our educators, all university-trained, are equally committed to advancing Uganda's progress. Yet, a significant challenge remains: the lack of essential infrastructure in Science education.

The Global Uplift Project's *Science Lab in a Box (SLaB)* program has already demonstrated remarkable improvements in nationally standardized Science test scores. With its deployment in many of our top-performing high schools, we anticipate a new generation of well-prepared scientists, engineers, IT professionals, doctors, and other skilled technology experts.

Please know that our entire Rotary team is fully committed to the success of this groundbreaking program. Each SLaB installation will be supported by a local Rotary Club and a designated club champion. The initiative will be under the capable leadership of Deborah Luyima from the Rotary Club of Muyenga, one of Uganda's most distinguished Rotarians. She can be contacted on kimydala@yahoo.co.uk or +256-752666998.

We understand this may be the first time an entire nation's Science education system is being uplifted in this way. We are deeply honored to be part of this pioneering endeavor and are committed to making it a global model of educational transformation.

Thank you sincerely for your support and partnership.

Yours in Rotary Service,

Christine Kyeyune Kawooya
