ICSEE

MAASAI STOVES &
SOLAR PROJECT

of the International Collaborative

Founded in 1992, International Collaborative for Science, Education, and the Environment ([ICSEE](http://www.internationalcollaborative.org)), first programs helped to establish women's businesses and clean water resources in remote Zanzibar villages.

Upon becoming aware of the health-threatening problems stemming from the smoke from indoor stove use and high wood fuel consumption, the founder of ICSEE began designing an efficient stove. This new stove would fit in the homes, get the smoke out, and would work well for the women's traditional cooking methods.

The local Maasai women are trained to install the smoke-free stoves, chimneys, and solar microgrids that provide electricity to the homes and livestock fields. In addition to the stoves project, ICSEE also installs water filtration systems to provide potable water, leads women's empowerment groups, opened a feedlot to supplement the cattle grazing, and more.

Partner Name:

ICSEE (International Collaborative for Science, Education, and the Environment)

Partner Website:

www.internationalcollaborative.org

Partner Location:

Tanzania and Kenya

Partner Mission:

Strives to enable people in the developing world to improve their health and lives, and to provide a cleaner environment for all. Empowerment is at the core of every aspect of their work.

TGUP Projects:

Trained Maasai women to install clean burning stoves and solar microgrids. Also funded the installation of clean water systems to prevent water borne illnesses.
