

# Science Lab in a Box

Narayani English Public School

Basantapur, Nepal

## **Project Name:**

TGUP's Science Lab in a Box (SLaB)

## **Project Location:**

Narayani English Public School,  
Basantapur, Nepal

## **Project Summary:**

Fund a large selection of supplies and materials for the science lab as chosen by the school.

## **Needs Assessment:**

The school has a science lab but it is poorly equipped so it is difficult to conduct practical experiments.

## **Project Partner:**

Little Sisters Fund  
[littlesistersfund.org](http://littlesistersfund.org)

## **Project Cost:**

\$2,040

TGUP's **Science Lab in a Box (SLaB)** provides the equipment, instruments, and supplies needed to teach international-standard laboratory science at the high school level anywhere in the developing world.

The Narayani English Public School has 1,600 students and 110 dedicated staff. Grades 8-12 all take courses in Physics, Chemistry, Biology, Geology & Astronomy, and Environmental Science. The new SLaB equipment will allow for practice experiments in all of these subjects.

**SLaB** is available to schools with the requisite curriculum, infrastructure, and qualified teachers in place. It is hoped that it will catalyze further interest and explorations in science for all those schools and students who use it. There is no cost to the recipient school, though TGUP does request reporting on changes in test scores, matriculation, etc. that occur as a result of **SLaB**.

For more information about **SLaB**, go to [tgup.org/slab](http://tgup.org/slab).
